DETAILED ACTION

This action is a continuation of applicant's earlier filed application serial number 09/990,033 filed November 21, 2001, now US Patent 6,645,227.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 6-16 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 8-18 of prior U.S. Patent No. 6,645,227. This is a double patenting rejection.

Claims 1-5 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-5 of U.S. Patent No. 6,645,227. Although the conflicting claims are not identical, they are not patentably distinct from each other because the limitation of distinguishing claim 1 of the patent "removing the placement portion from the such that the attachment portion remain in the bone" is a method step that would have been obvious to perform so as to remove the non-essential tool portions from the bone once the anchor is in place.

The allowance of these claims would extend the rights to exclude already granted in the patent – that right include A method for securing a suture anchor, the method comprising: inserting an attachment portion of a suture anchor within a bore hole formed in a bone, the suture anchor further comprising a placement portion frangably connected to the attachment portion, the attachment portion of the suture anchor having an outwardly projecting barb that scores at least a portion of the bone bounding the bore hole as the attachment portion is inserted into the bore hole; applying a withdrawal force to the suture anchor such that the attachment portion of the suture anchor rotates within the borehole and disconnects from the placement portion of the suture anchor; and removing the placement portion from the bone such that the attachment portion remains within the bone.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Luscombe et al (US Patent 5,683,418).
